

START TODAY!
**CONVENIENT AND
TAILORED HEATING**

Starter set Heating – basic

HmIP-SK26

The intuitive Homematic IP app and the radiator thermostat are ideal for getting started in a smart home. The customised heating profiles enable you to heat only the rooms you want to. The Access Point – basic is the interface to your smart home. It enables communication with up to 20 Homematic IP devices via the cloud using the app.

homematic **IP**
Smart living, simply comfortable

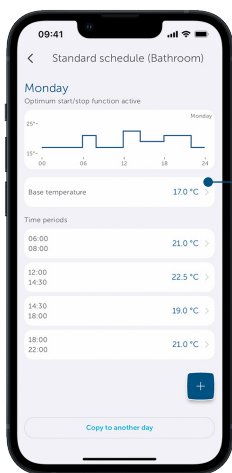

Manual or automatic radiator control

Connects the devices to the app via the cloud

PARTICULARLY FLEXIBLE THANKS TO WIFI 2.4 GHz

Easy installation without tools or having to change anything in your heating system

Customised heating profiles via the free Homematic IP app

Do you want to use more than 20 devices in your installation? If so, you will find other alternatives at www.homematic-ip.com.

TECHNICAL SPECIFICATIONS

Access Point – basic:

Supply voltage	Power supply unit (5 VDC)
Supply voltage	100 V-240 V/50 Hz
Plug-in mains adapter (input)	
Ambient temperature	5 to 35°C
Dimensions (W x H x D)	100 x 40 x 19 mm
Typical Range in open space	250 m

Radiator Thermostat – basic:

Supply voltage	2x 1.5 V LR06/Mignon/AA
Battery life	2 years (typical)
Ambient temperature	0 to 50°C
Dimensions (W x H x D)	57 x 68 x 102 mm
Typical Range in open space	250 m
Threaded connection	M30 x 1.5 mm

Further technical details and information can be found in the data sheet for the respective device.

A COMFORTABLE TEMPERATURE AT ALL TIMES

The room temperature is controlled according to the user's needs: easily via the app, whether you are at home or on the go, directly at the device or by convenient voice control (via Amazon Alexa or Google Assistant).

EASY SAVINGS ON HEATING COSTS

Customised temperature curves are easy to create using the app – with up to 3 adjustable heating profiles and 13 changes a day. So the heating only comes on when warmth is needed. You can make heating energy savings of over 33% by including window contacts in your network.

OPEN-WINDOW DETECTION

Open windows and doors are detected via the open-window detection function or even more precisely in combination with a Homematic IP Window and Door Contact. The room temperature is lowered automatically so that no energy is wasted.

QUICK AND EASY TO INSTALL

The union nut ensures secure installation on any conventional radiator valve. Installation is quick and easy with no need to make changes to the heating system or drain water from the radiator.

MANY EXTRA FUNCTIONS

- ✓ Boost function: to quickly warm up a room
- ✓ Eco mode: energy-saving operation with reduced room temperatures
- ✓ Valve protection function: protection against calcification
- ✓ Operating lock: protection against unintentional operation

LOGISTICS DATA

Product reference	160955A0
EAN code	4047976609550
Short description	HmIP-SK26
Packaging unit	24
Packaging dimensions	184 x 140 x 97 mm
