

AN ENTIRE
SMART HOME
IN JUST ONE APP

Homematic IP smartphone app

The free app for iOS and Android enables the Homematic IP Smart Home system to be completely configured and controlled via smartphone, tablet and smartwatch – without any follow-up costs. Configuring new devices and customised system set-up are quick and easy thanks to the intuitive user guidance.

homematic ^{IP}
Smart living, simply comfortable

SMART HOME FROM A SINGLE SOURCE

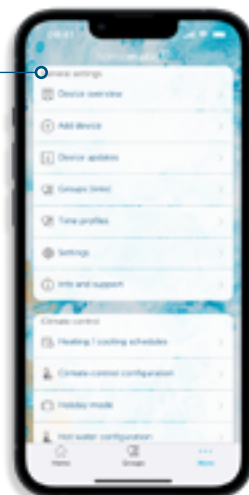

Controls the entire smart home with a tap of the finger and provides an overview of the current status of all devices and functions in the system. In the event of an alarm, e.g. for burglary, fire or water damage, users will be alerted immediately by a push message and display in the app.

The app for Apple watches and Android-based smartwatches can be used to set up to 10 functions as favourites for switching actuators and operating the front door.

The main menu offers numerous configuration options for all applications in the Homematic IP Smart Home

Additional services such as Amazon Alexa or Google Assistant can be easily integrated

TECHNICAL SPECIFICATIONS

Operating systems for smartwatch	Wear OS (from version 3) watchOS (from version 10)
Costs	Free of charge (without follow-up costs)
Languages	German, english, french, dutch, italian, spanish, polish, norwegian, danish, swedish, czech

THE APPROPRIATE FUNCTION FOR EVERY APPLICATION

Intuitive app for clear operation right from the start – the Homematic IP app offers the perfect configuration option for all smart home applications. This includes, for example, setting up individual heating schedules for each room, creating groups for controlling lighting and shading, activating the protection mode or the energy-saving eco mode for room climate control. The automation function even makes it easy to program your own functions.

FREE UPDATES FOR MORE FUNCTIONS

The Homematic IP app is constantly being updated and expanded with free additional functions. In this way, the app grows automatically with the demands of a smart home.

SMART CONTROL, NO MATTER WHEN AND WHERE

The entire smart home world can be operated and configured via the app, whether at home or on the move. Home favourites are available for quick access to individual functions, which can be individually defined by the user.

MAXIMUM SECURITY AND DATA PROTECTION

- ✓ Awarded by the VDE for maximum information security
- ✓ Secure in use, without any need for registration
- ✓ Operation of Homematic IP Cloud only on German servers

CUSTOMISED DISPLAY

- ✓ Upload your own photos as the wallpaper
- ✓ Light and dark mode to transfer system settings for the appearance to the Homematic IP app

Operation requires a Homematic IP Access Point or control unit to be installed!
